## CORONAVIRUS-2

The name "Corona" means "crown" or "circle", because the cells in question are encircled with a ringlet of tufts.

The tufts adhere themselves to the membrane of the lung cell of a person, then the virus enters it.

When it has entered it begins to replicate itself, until the cell is full of viruses, which then burst the membrane and begin to infect other cells.

In this way these viruses make a person sick with lung disease.
